Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 fails to define a method of extracting electrical from mechanical motion. The method step involves no actual extraction of electricity at all. Claims 2-10 are yet confusing although the REMARKS made the claims somewhat understandable. However, note that claim 3 cites a "member coupling the transducers". Claim 4 notes "the member" which can only refer to the claim 3 "member coupling the transducers" as having a waved surface. The waved surface is not shown as actually coupling, i.e. connecting in any true mechanical way, the transducers. Claim 5 notes "the coupler" which, if proper antecedent basis is to be had, can only refer to the same "member coupling the transducers" to which claim 4 refers. So the actual structure is not clear because both claims 4 and 5 appear to refer to the same component, albeit using different language. Claim 5 notes that the coupler contacts the waved surface on a first side of the coupler, which coupler has been noted as being defined by "the member" (claim 4) that couples the transducers (claim 3). So the coupler appears to contact its own waved surface on a first side. In the figures (e.g. 20a), the coupling and the waved surface are distinct. The couplers are components 434 which are at the end of the coupling mounts (430). While the wave plate (330),

Art Unit: 2834

while coupled to the couplers, is not itself a coupler that couples transducers. As a result the claims are not distinct and remain rejected for indefiniteness.

Note that the claims are yet so indefinite that art cannot be properly applied against them. When they are made definite a consideration of their relationship to the prior art may be made.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
